DEAR FRIENDS OF GCEE

2021 was a year of transition for the Georgia Council on Economic Education as we continued to find new ways to serve K-12 teachers effectively. As schools and school systems across the state shifted from virtual learning settings back to in-person settings, we continued to create engaging workshops and resources to meet the needs of teachers and students.

It was a year that saw us create and release the popular EconExpress website, a children’s book focusing on allocation strategies, the K-5 Econ Ed Expo, and many other effective resources. We also helped create and launch National Economic Education Month in October. All our hard work paid off as we served a record 4,890 teachers from 141 of Georgia’s 181 public school systems.

The Georgia Council also worked very closely with the Georgia Department of Education to update the required high school economics course to include additional personal financial literacy standards and concepts.

Our 2021 accomplishments were made possible through the generous support of countless individuals, foundations, businesses, and friends who share our mission of helping teachers. The Georgia Council effectively serves teachers and students as a result of this support. We are truly thankful for such an outstanding network of friends and supporters.

We look forward to a successful 2022 as we celebrate 50 years of serving teachers.

-Mike Raymer, Executive Director
Helping Teachers

“GCEE helps me enhance my instructional skills so I can assist my students in connecting economic content to real life.”

-Ivory Roberson, Jonesboro High

A day with Jacob Goldstein
Recognizing GCEE for its significant accomplishments, demonstrated best practices and outstanding service in Georgia

Recognizing GCEE for making outstanding contributions to the civic and cultural vitality of the state
Recognizing Student Excellence
The Georgia Council conducts numerous student competitions throughout the year to give students opportunities to showcase their economic and personal finance knowledge.

Personal Finance Challenge
A competition that allows high school students to demonstrate their knowledge of financial literacy.
Toombs County High School - Access Zone Champions
Luella High School (Henry County) - Georgia Champions

Georgia Economics Challenge
A quiz bowl style competition for high school students covering all areas of economics.
Sandy Creek High School (Fayette County) - David Ricardo Division Champions
Chattahoochee High School (Fulton County) - Adam Smith Division Champions

Lights, Camera, Budget!
An online game in which students answer personal finance questions to earn money to put toward producing a movie.
Baldwin Middle School - Middle School Winner
St. Pius X Catholic High - High School Winner

Stock Market Game
A 10-week competition in which students invest a hypothetical $100,000.
Augusta Christian School - Spring Winning Portfolio of $175,854
LK Moss Elementary School (Marion County) - Fall Winning Portfolio of $149,528

Econ Games
A competition in which 4th and 5th grade students compete in three rounds: assembly line, testing, and problem solving.
Metro Atlanta Competitions:
Springdale Park Elementary - 4th Grade Winner
Main Street Academy - 5th Grade Winner
Crabapple Elementary - 5th Grade Winner

South Georgia Competition:
Westside Elementary - 4th Grade Winner
Lanier County Elementary - 5th Grade Winner

Henry County Competition:
Impact Academy - 4th Grade Winner
Timber Ridge Elementary - 5th Grade Winner
GEORGIA ECONOMICS TEACHER OF THE YEAR

Misha Thompson
Mt. Zion Elementary School
Clayton County

As a Zoology major at Auburn University, Misha Thompson planned to go into the medical field. But when a friend urged her to take an educational psychology course, everything changed. “That’s when my love affair with education began,” she says.

She immediately changed her major to education and decided to become an elementary school teacher. After teaching first grade for several years, she earned her gifted certification. Now in her 27th year, she currently teaches third to fifth grade gifted students at Mt. Zion Elementary in Clayton County, where she’s been since 2013.

Beyond teaching the standards, Thompson believes in infusing economics into her lessons whenever she can. “Teaching economics at an early age gives them power as a consumer,” she says. “I want them to be productive citizens working as part of the economy.”

For her fourth and fifth graders, she uses an entrepreneur-themed unit where they create a business, earn a “grant” to fund the business, develop a business plan and create a replica of their business front. Her fourth and fifth graders also play the Stock Market Game, which she calls a “tool of empowerment.”

In a unit on topography, Thompson’s third graders plan a road trip “driving” from east to west. They have to create a budget and a daily expense sheet that factors in the cost of a rental car, gas and meals.

Thompson tries to keep it fun for both herself and her students. “I want them to learn without realizing they are learning,” she says. She also depends on Georgia Council workshops for new ideas. “They give you all the tools you need to apply the lesson the very next day,” she says. “The workshops enlighten me to new resources and new places.”

GEORGIA ECONOMICS TEACHER OF THE YEAR

Jay Travis
Luella High School
Henry County

Because his mother is a teacher, Jay Travis figured he might follow in her footsteps. But it was his high school social studies teacher who really “sealed the deal” for him. “He used games and simulations in his class to make it fun and help us learn,” remembers Travis. “I decided that was the kind of teacher I wanted to be.”

For the last 21 years as a social studies teacher, Travis has tried to make every lesson he teaches fun, interactive and engaging to help students understand and connect with the concepts. He currently teaches Economics and AP Macroeconomics at Luella High School in Henry County.

He has designed themed units around Star Wars to demonstrate how supply and demand shapes a market, a “Fast and Furious” FOREX game in which students buy and sell cars with different currencies to understand the dynamics of currency fluctuations, a game where students build products with Legos that represent the factors of production, and many others. Students look forward to coming to class to learn.

His efforts have paid off. Since coming to Luella High School in 2016, students’ end-of-course-test and AP test scores have significantly improved, and he had a winning team in the 2021 Georgia Personal Finance Challenge.

While he comes up with many creative ideas on his own, Travis has also looked to GCEE for help. “I always come back with so much helpful material,” he says, “so I try to attend every GCEE workshop I can.”

His main goal is to prepare students for life beyond high school. “To me, the most rewarding thing is knowing that my students are able to use what they learn to make good decisions and make the world a better place,” he says.
Phil Sykes, Social Studies Content Specialist for Coweta County School System, often gets emails from teachers immediately after they’ve attended a GCEE workshop, thanking him for the opportunity and asking him when the next one will be.

“GCEE teaches teachers how to teach economics in fun and creative ways,” says Sykes. “Teachers receive resources and lesson plans to use in their classrooms the next day. That is so powerful.”

Sykes, who was a middle school social studies teacher for six years, attended GCEE workshops and knows firsthand the benefits they provide to teachers. That’s why he is always eager to direct teachers to the Council’s workshops and programs. In the last few years, the school system has hosted 15 GCEE workshops. Coweta County students also compete in many of the Council’s competitions.

Sykes says elementary teachers enjoy GCEE workshops that include literacy and are grateful they receive the picture books used in the workshop to take back to their classrooms. His teachers also appreciate the site visits GCEE sponsors, such as trips to the Kia Plant in West Point and Pinewood Studios (now Trilith Studios) in Fayetteville.

Sykes says Coweta’s commitment to economic education is part of the system’s overall mission. “The mission of the district is to empower students for success,” says Sykes. “If we don’t do a good job explaining how the economy works, they are not going to be successful. They have to make choices, and choices have a cost. By providing students with a solid understanding of how things work, they can make good, responsible choices themselves. If not, then they can’t sustain themselves in a world driven by choices and money management.”

The Georgia Council is honoring the Georgia Partnership for Excellence in Education for the outstanding work it has done for the last 30 years to inform and influence Georgia leaders with the goal of improving student success.

“By working to increase student achievement and workforce development, the Partnership has made Georgia a better place to live, work, and prosper,” says Mike Raymer, GCEE Executive Director. “Their work has improved education and educational outcomes for tens of thousands of Georgia students over the years.”

Founded in 1992 by the Georgia Chamber of Commerce and the Georgia Economic Developers Association, the Partnership was created to be a voice and an advocate for change in the public education system to foster economic development, workforce development and prosperity for the state.

“We are designed to be a convening place where education, business, workforce development and public service officials come together to discuss and advocate for strong educational policies that help move Georgia forward,” says Dana Rickman, PhD, president of the Partnership. “Our work tends to have a workforce development and economic development lens to ensure there are good career pathways and economic opportunities for all Georgians.”

Through research reports, regional and statewide events and presentations to educational leaders and stakeholders, the Partnership aims to bring everyone to the table to discuss the state’s most pressing educational issues and shape policies to address those issues. “We are trying to elevate the discussion of state education policy above the political noise to focus on what works well for kids in schools and families,” says Rickman.
